**DETAILED ACTION**

***Application status***

Claims 18-49 are pending in this application.

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 18 and 19, drawn to an isolated and purified protein comprising an amino acid sequence of SEQ ID NO: 2.

Group II, claim(s) 18 and 20, drawn to an isolated and purified protein comprising an amino acid sequence of SEQ ID NO: 4.

Group III, claim(s) 21-25, drawn to a purified preparation of antibodies.

Group IV, claim(s) 26-37, drawn to an isolated and purified polynucleotide comprising the nucleotide sequence, an expression construct, and a host cell.

Group V, claim(s) 38-43, drawn to a method of detecting an expression product of a gene encoding the protein.

Group VI, claim(s) 44-49, drawn to a method of screening for candidate therapeutic agents.

If the Applicants elect one of Groups III-VI, additional election is required from the following groups under 35 U.S.C. 121 and 372.

The inventions which correspond to each of SEQ ID NO: 1 which encodes the amino acid sequence of SEQ ID NO: 2 or SEQ ID NO: 3 which encodes the amino acid sequence of SEQ ID NO: 4.

It is acknowledged that some claims have been grouped in multiple groups. These claims will be examined to the extent they read upon the elected group.

The inventions listed as Groups I and VI and the inventions of SEQ ID NO: 1 which encodes the amino acid sequence of SEQ ID NO: 2 and SEQ ID NO: 3 which encodes the amino acid sequence of SEQ ID NO: 4 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. Kearns et al. teach the polypeptide comprising amino acid sequence of SEQ ID NO:2 of claim 18, and thus, the shared technical feature of the groups is not a "special technical feature", unity of invention between the groups does not exist (Kearns et al., J. Biol. Chem., 2001, 276 (45), 42213-42218, See attached reference).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
